

▶ The Six Sigma Wizard™

Enhance training and retention with BMG's online reference portal and study aid

Six Sigma training can be both rewarding and challenging. Students are exposed to so many new concepts that they may easily become overwhelmed. To ensure the greatest opportunity for success, BMG has developed the Six Sigma Wizard™, an online reference portal and study aid for Six Sigma practitioners in training.

The Six Sigma Wizard extends learning beyond the classroom with recorded lectures, quizzes, tools, templates and live Master Black Belt project assistance. Black Belt and Green Belt students have access to the Wizard at any time, night or day, during their Six Sigma training. Most students will also use the Wizard to complete their Six Sigma certification exams.

Description and Features

The Six Sigma Wizard is a web-based, interactive system that features supplemental training tools and study aids, as well as access to BMG's experienced Master Black Belts. Students can review material, practice applying what they have learned and test their knowledge.

▶ Interactive eLearning Lectures with Audio

The Wizard offers interactive, Flash-based lectures on key Six Sigma topics covered in Belt training. Students can view the lectures online at their convenience, either as refresher tools or as pre-class material. Many lectures include Minitab and Excel examples so students can put their skills to use instantly with samples to guide them.

▶ Master Black Belt Assistance

A distinctive feature of the Wizard is the Master Black Belt online chat. Three convenient sessions each day makes it easy for students to seek guidance and receive immediate feedback on their most pressing Six Sigma questions. BMG's MBBs are also available for project mentoring and exam preparation assistance. Our experts have real-world knowledge. As previous deployment leaders, corporate MBBs and business strategists, they understand the challenges of completing Six Sigma projects, and the complexity of the subject matter.

▶ Quizzes & Exams

The Wizard's online quizzes provide a valuable way for students to verify their knowledge in a non-threatening manner. Quiz results are not calculated as part of the final grade, so students can discover where they need improvement before attempting their certification exams, which are also provided in an interactive and intuitive online format.

(continued)

"The Wizard was one of the main reasons we chose BMG. We have people all over the world and the Wizard helped us support them remotely."

--Shari Baumgart

KEY BENEFITS

- ❑ Increase retention and learning. Review topics and self-test at any time, boosting understanding and retention.
- ❑ Find information quickly. Comprehensive catalog lets you search on almost any Six Sigma topic.
- ❑ Get expert advice when you need it. Access project support from BMG's veteran MBBs at any stage of your project or training.
- ❑ Refresh your skills. Just-in-time training is at your fingertips – from interactive Flash-based lectures to templates and examples.
- ❑ Study for certification exams. Quizzes, examples and tools help you practice your skills and test your knowledge.

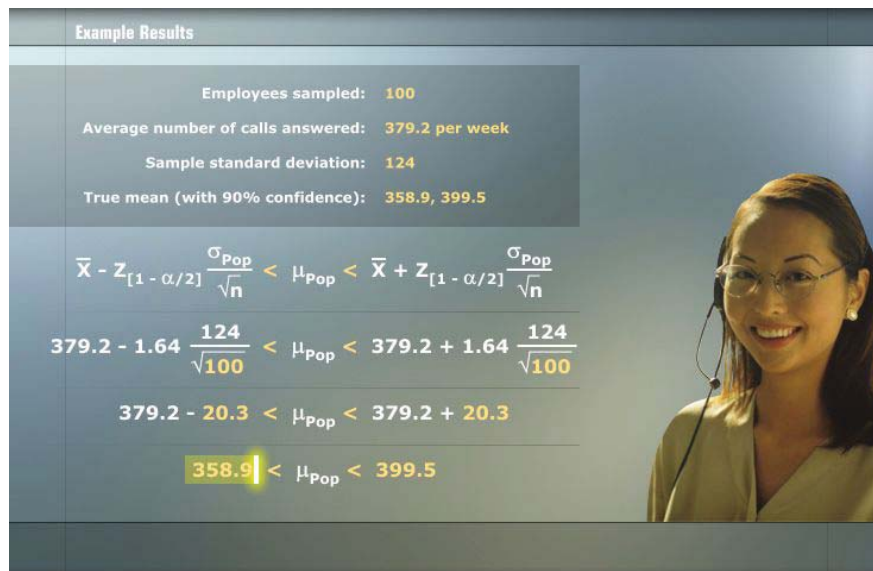

The Six Sigma Wizard™

▶ Practical Exercises and Homework

The Wizard includes sample exercises and solutions for each phase of the DMAIC roadmap. This allows students to study examples for a variety of scenarios, and to check their work against BMG's recommended approach.

▶ Catalog of Supplemental Information

Students can browse the Wizard's catalog of supplemental material, including Six Sigma tools and templates, course notes, homework, exam files and more. The catalog is searchable by keyword, allowing students to access information on any topic quickly and easily.

The Wizard's interactive, Flash-based content allows students to review complex material as often as needed, and also makes learning fun.

▶ Minimum Hardware Requirements

- 333MHz or faster Intel CPU
- 128MB RAM
- 56K modem (DSL, Cable or T1 preferable)
- 800x600, 16-bit color monitor
- Soundcard, speakers/headphones

▶ Minimum Software Requirements

- Windows 98SE/NT 4.0/2000/XP
- Internet Explorer 6.0 or later
- Flash Player 6.0.40 or later

Additional requirements and configuration settings may apply.

"BMG's Six Sigma Wizard is a big help because it provides you with the ability to go back and review lectures at any time."
